Title: Send a Message Feature Test

Test case#: 1

Description: A user should be able to login, navigate to the Send a Message feature in the drop-down menu, and successfully send a message.

Test Steps:
1. Navigate to 'https://staging.joordev.com'
2. Click on person login icon in top right corner
3. Add email/username and password credentials and click sign in
4. Hover over Messages tab and click 'Send Messages'
5. Click either 'SEND TO ALL MY CONNECTIONS' or 'SELECT CONNECTIONS'' (in this test case we are going to click 'SELECT CONNECTIONS' and click on connection 'JOOR Regress')
6. Add entries to subject and body of message feature
7. Click send

Expected Results: 'Your message has been sent' pop up box appears for a short period of time verifying the message has been sent successfully. If an input is not filled out, a pop box will say 'Your message could not be sent.' along with which field needs to be filled out.

Coded: Yes

Pass/Fail: Pass
